Allowable Subject Matter

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-11, claims 12-17 and claims 18 and 19 are drawn to three methods for evaluating the security of a cryptographic device to recover useful information about a key, a system for evaluating the security of cryptographic hardware, and a method for analyzing externally measurable characteristics of a cryptographic device, respectively. Applicants have filed an IDS on 04/23/2009 that lists two references that are collections of e-mail communications among participants of a group. The subject of discussion is about preventing Kocher's timing attack, for example, by either making sure that the cryptographic computations time is not dependent upon the data being operated on or utilizing a blinding scheme. In the blinding scheme the data is blinded beforehand and unblinded after the cryptographic operation.

However, the above references neither teach nor suggest that a connected cryptographic device to an analog-to-digital converter configured to measure an attribute related to the operation of said device, sending a plurality of command sequences to the device to cause the device to perform a cryptographic operation to process data using a key and determining whether information about the key is leaking from the device.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
